Forecast for Wednesday 05 Apr 2023

Weather: Cloud thickening from the west overnight and into the morning, to bring outbreaks of rain to the park by late morning. Outbreaks of rain then persist through daylight hours, occasionally giving some heavier bursts. By midnight the rain should become lighter and patchy.

Chance of cloud-free hill tops above 600m: 90% at first but deteriorating to 20% by late afternoon, especially on southwest facing summits.

Low cloud and visibility: Good at first but deteriorating to moderate to poor visibility by midday, with cloud bases lowering through the afternoon becoming persist at around 400-500m, perhaps 300m by evening, especially on southwest facing upslopes.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

As mentioned above poor visibility gradually developing, and wet conditions combined with breezy winds will give a significant chill at summit height as the day progresses.

Recent rainfall: measured at Cat & Fiddle: altitude 511m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
14:00 on Tue 04 Apr 2023	0mm	0.2mm	0.2mm

Forecast for Thursday 06 Apr 2023

Weather: Patchy light rain and drizzle in the early hours, will gradually clear to showery conditions by daybreak. Showers could be locally heavy for a time in the first part of the day, with a low risk of thunder/hail. However, these should become lighter and isolated through the afternoon into the evening, to give a largely dry end to the day with sunny spells.

Maximum wind: West-Northwest 20mph, gust 30-35mph, decreasing later.

Chance of cloud-free hill tops above 600m: Near zero in the early hours but improving by daybreak to become 90% or more by early afternoon.

Low cloud and visibility: Poor visibility with cloud bases around 200-400m in the early hours, but improving by daybreak with cloud breaking and gradually lifting through the morning, becoming largely clear of summits by early afternoon.

Temperature: **Valleys:** Plus 6 Celsius becoming Plus 11 Celsius.
At 600m: Plus 4 Celsius.
Freezing level: Above summits.
